

## Why Jeeves?

# Seamless growth

WIKIPEDIA  
*The Free Encyclopedia*

Growth refers to an increase in some quantity over time. The quantity can be:

- Physical (e.g., growth in height, growth in an amount of money)
- Abstract (e.g., a system becoming more complex, an organism becoming more mature).

For us, it's important that the system is adapted to small enterprises but can be expanded as the company grows."

Jan-Ove Svensson, project coordinator, Decor Maison, Sweden

**Growing is a natural part of a business' evolution. Growth can be seen as an increase in size, increasing complexity, an increase in transactions, structural changing within a group of companies, and entering new markets and segments and so on. A by-product of growth is the changes in a company's business processes.**

### **DECISIONS - SMALL OR LARGE ERP SOLUTION**

Outgrowing an ERP system is expensive – very expensive. No one wants to have to go through the research, evaluation, procurement and implementation phases and have to learn new systems more than they have to. It requires a large investment of both time and resources. Make sure your company is proactive and doesn't have to go

through this tedious process more than absolutely necessary.

Being proactive and purchasing a system robust enough for growth is all well and good, but it also can be a costly and time intensive investment. Of the same token, investing in a smaller ERP system that is not scalable and having to re-invest in a new system down the road is a costly and time intensive investment

as well.

Jeeves takes this into consideration. We offer a lean version for smaller companies with the option of easily and seamlessly adopting the larger, full scale version to meet your growing company's evolving needs.

### **INVEST IN JEEVES FOR GROWTH**

Within Jeeves we use the term 'seamless growth' – to grow seamlessly within the system all the while evolving your business. To do this, Jeeves Apps Technology architecture is built to accommodate smaller operations with Jeeves Selected as well as larger operations with Jeeves Universal.

The possibility to seamlessly grow and scale up to a more complex solution is hard to find anywhere else - other ERP requires change of platform and solution.”

Niclas Winroth, CFO, Frank Dandy, Sweden

Jeeves is one of the few ERP solutions on the market today offering you an easy, affordable, toned down version for smaller companies. Jeeves understands that at any given moment your organization may break out into a full blown multi-company, multi-national, multi-million dollar company. This is precisely why, if and when you outgrow Jeeves Selected, you simply need to activate a new license code – no conversions, no new implementations and no new start-up and learning period. Seamlessly unlock the advanced world of Jeeves Universal!

#### **JEEVES SELECTED**

Jeeves Selected is specifically targeted for smaller companies with ambitions to grow and evolve their businesses. Jeeves Selected is role-based and includes predefined processes adapted for smaller companies, making it easy and intuitive to use. It may also be used in the interim for larger companies looking for a quick and easy ERP solution.

#### **JEEVES UNIVERSAL**

Jeeves Universal offers a much deeper functionality in order to support the more complex, involved structures and aspects of a company, such as operations in many countries or a complicated manufacturing process.

#### **TWO SYSTEMS - ONE SOLUTION**

As both Jeeves Selected and Jeeves Universal share the same business logic and data models, it's very simple and intuitive for a user of Jeeves Selected to make the adjustment to Jeeves Universal. Thanks to a common database, it's also possible within an organization with smaller and larger subsidiaries and companies to combine the use of both Jeeves Selected and Jeeves Universal to meet their unique needs.

#### **LOW COST OF GROWTH**

To have a system that you cannot outgrow means it is very easy to estimate the total cost of ownership. With Jeeves you are always prepared for the future!
